

ReGen: nfina NUC Systems

ReGen is the CT partner for nfina

PCs and Thin Clients

Nfina's 100 Series products are powerful PCs and thin clients housed in an extremely compact form factor. This scalable computing platform can be configured with a choice of Intel® Core™ or Celeron® processors, 2.5" SATA, SAS or SSD drive, and a M.2 SSD drive for faster data transfer. The Nfina 100 Series products prove that superior power and performance can exist in a small form factor (SFF) device.

100i7

The Nfina Technologies' 100i7 PC defines intelligent computing in a small package. With features like M.2 SSD drive support for faster data transfer, integrated Intel® UHD graphics, and the latest 10th generation Intel® Core™ i7 processor, the Nfina Mini PC proves that superior power and performance can exist in a small form factor (SFF) device.

100i5

Offering clutter-free computing, the Nfina 100i5 PC is an energy-efficient, fully scalable computer that mounts neatly on the back of a standard VESA® mount monitor. The 100i5 PC comes equipped with lightning fast M.2 SSD drive support and the latest 10th generation Intel® Core™ i5 processor featuring Intel® Turbo Boost Technology 2.0, giving you extra GHz on demand to maximize performance on processor intensive tasks.

100i3

The Nfina Technologies 100i3 PC provides the powerful performance and capabilities of a desktop computer system in a compact, 4.5 inch square design. Equipped with the latest 10th generation Intel® Core™ i3 processor this energy-efficient computer offers everything you need for small office or commercial use including Windows OS®, integrated Intel® HD graphics, and WiFi. The 100i3 is a great option as a Thin Client or Virtual Machine for use with a centralized server.

100c3

With up to 2.7GHz of Intel Celeron processing power, the 100c3 is a hefty PC in a small form factor. Used with a centralized server this product is the perfect Thin Client or VM for use in a small office network, school, or retail establishment.

About ReGen

ReGenerating Solutions (ReGen) has been providing technology solutions and services since 1983. ReGen is dedicated to offering quality technology solutions including Hardware and Network Design, Data Backup and Recovery, Dark Web Monitoring, Phishing Simulation Training, Phone systems as well as HelpDesk services.
